US Citizen in Virginia • Open to relocation

EDUCATION

Western Governors University

B.S. in Computer Science

– Graduated 2026

EXPERIENCE

Ephemera

January 2026 – May 2026

Founding Product Lead

Remote

- Employee #1 at an early-stage AI-native creator platform used by dozens of celebrity talent; shipped inbox automation, deal management, payments, and admin tooling.
- Delivered new features on compressed timelines, building end-to-end functionality over weekends to ensure working demos were ready for Monday investor meetings, helping secure six-figure investments for the company.
- Worked directly with beta talent, the founder, and investors to translate feedback into product direction and shipped features.

Uber AI Solutions

June 2025 – January 2026

AI QA Tester

Remote

- Evaluated LLM outputs for coding and software-development accuracy through RLHF, identifying logical errors, edge cases, and flawed implementations.
- Applied Java and software-engineering expertise while independently managing remote annotation workflows alongside full-time undergraduate study.

Independent Contractor

August 2024 – January 2025

Video Editor

Remote

- Managed end-to-end post-production for a web series, incorporating stakeholder feedback across revision cycles and delivering polished episodes on deadline.

PROJECTS

Ephemera AI Talent Agent & Web Platform

- Built and launched a full-stack AI talent platform as lead developer, enabling celebrities and creators to negotiate and execute brand deals through an AI-powered inbox, deal workflow, and dashboard.
- Engineered an autonomous deal agent that processed hundreds of commercial emails, extracted terms, enforced creator constraints, and negotiated, accepted, or rejected offers using rules and LLM reasoning.
- Integrated Gmail, Outlook, OAuth, Google Pub/Sub, Microsoft Graph, PostgreSQL/Supabase, and Stripe with row-level security, rate limiting, and server-side validation.

[Evanflow \(400+ GitHub stars\)](#)

- Open-sourced a TDD-focused agent workflow system for Claude Code with 16 custom skills and an orchestration layer spanning ideation, implementation, testing, and self-review.
- Grew the project to 400+ GitHub stars through community adoption and developer engagement.

[Polypore IDE](#)

- Released an open-source Tauri/React/Rust desktop IDE for agent-driven software engineering with persistent long-term memory and structured context across sessions.
- Embedded an MCP server exposing skills, memory, secrets, and editor state as tools, letting agents operate the IDE directly rather than through shell guesswork.

CERTIFICATIONS

ITIL 4 Foundation Certificate in IT Service Management — PeopleCert, March 2025

Linux Essentials Professional Certificate — Linux Professional Institute, June 2025
